

THE PROBLEM

Glutathione is fragile and gets destroyed in the gut, which makes it difficult to make a supplement that your body can absorb. At Neumi, we've found a solution.

You can now have increased glutathione every day thanks to Neumi's proprietary HydraStat Nano Technology!

THE SOLUTION

Supplements are only as good as their bioavailability. You can take as many supplements as you want, but without proper absorption the results are limited.

Bioavailability happens on the surface area of the cell, and Neumi has cracked the code to increase surface area unlike ever before.

Our nano-sized particles are so bioavailable that they can be absorbed through your skin and your oral mucosa.

BENEFITS OF DAILY USE

- Immune Booster
- Joint Support
- Cognitive Health
- Sustained Energy
- Workout Recovery
- Improved Sleep

NUTRISWISH

All the nutrients your body craves, nano-sized for maximum absorption. Swish 2 teaspoons for increased immune support, increased focus, clean energy, and rapid recovery.

NEUMI SKIN

Neumi has solved the #1 problem in skin care, the problem of absorption. Neumi has nano-sized the best skin ingredients available to provide a simple solution to aging/dull skin.

GLUTATHIONE & NANO TECH

GLUTATHIONE: the protector and detoxifier of the cell. It's critical to the life, health, performance and longevity of every human cell... and that's just the beginning!

"The most powerful antioxidant you have never heard of... it's one of the keys to fighting off the diseases you fear the most. It's called glutathione. Now write it down because it's critically important."

- Dr. Mehmet Oz, The Dr. Oz Show

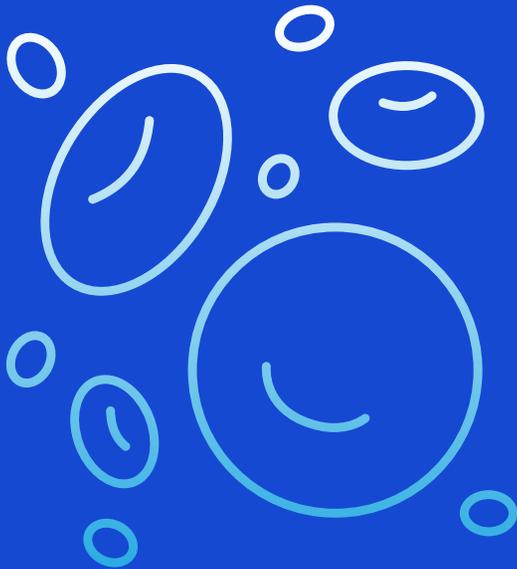

OVERSTATING THE IMPORTANCE OF GLUTATHIONE IS ALMOST IMPOSSIBLE

Glutathione is the cell's first line of defense against the toxins that enter your body through foods, liquids, oxygen and radiation.

To understand its importance, consider these four facts:

Without glutathione....

1. Every cell in your body would die prematurely.
2. The entire immune system of your body would surrender and cease to function.
3. Your liver could no longer cleanse any poison or toxin.
4. Oxygen based life (human) would be impossible.

BAD NEWS FOR YOUR BODY—YOUR GLUTATHIONE LEVELS ARE DECREASING

Your glutathione levels decrease at an average of 10% each decade after the age of 25.

As Glutathione levels decline your body pays the price!

- Weakened immune system
- Accelerated aging
- Increased cellular inflammation
- Increase in muscle and joint discomfort
- Increased fatigue
- Reduced athletic performance
- Slower recovery from exercise
- Reduced mental focus and clarity
- Toxicity build up
- Increased vulnerability to more than 70 major diseases

IT'S BEEN SHOWN THAT HEALTHY PEOPLE HAVE HIGHER LEVELS OF GLUTATHIONE

"If you're chronically run down; if you're chronically fatigued; if your body just isn't firing on all cylinders, low glutathione may be part of it, both cause and effect."

- Dr. David Katz, Director of Yale University's Prevention Research Center

IF GLUTATHIONE IS SO IMPORTANT, WHY HAVEN'T MOST PEOPLE HEARD OF IT?

Although glutathione may be unknown to the general public, it is well known to medical scientists, chemists, and molecular biologists.

In fact, there are twice as many scientific studies on glutathione recorded in PubMed* as there are on vitamin C.

Throughout the past two decades there have been tens of thousands of studies on glutathione and its relevance to health and longevity.

*Pub Med is the online medical science library of the U.S. Government.
